

Now enrolling!

Clinical trial for canine oral melanoma

We are enrolling patients in a randomized, placebo-controlled clinical trial to evaluate a novel investigational product in dogs with oral melanoma.

Study Specifics

Dogs will receive the novel investigational product or placebo every 2 weeks. Owners will be required to bring their dog to the study site for regularly scheduled appointments over a 6-month time period. Owners will also be required to document study associated observations as appropriate.

Eligibility:

- Must weigh at least 3kg (6.6lbs)
- Stage III oral melanoma (not confined to lip)
- No lung metastasis
- No prior Oncept® melanoma vaccine

Funding:

This is a fully funded study. At no cost to the owner, qualified patients will receive

- Veterinary consultation and examinations
- Lab work and diagnostics
- Investigational product (placebo patients may have the option to receive the investigational product in a follow up study)

If you have a patient you believe to be a good candidate for this study OR you are interested in participating as a clinical investigator, please visit animalci.com/oral-melanoma/ for complete details or contact us at ACI: 301.841.0014.

Thank you!
