

Partnering For Your Pet's Best Life

Atlantic Veterinary Internal Medicine & Oncology was founded in 1992 as one of eight specialty practices of Chesapeake Veterinary Referral Center (CVRC) in Annapolis, Hunt Valley, and Columbia, MD. Our team includes board-certified veterinary internists and oncologists, along with a highly-skilled and educated staff, to provide the best care for pets with serious and chronic conditions.

Our Mission

To provide a superior level of veterinary internal medicine and oncology for dogs and cats through an emphasis on commitment, compassion, and competence. We function as an extension of your primary care veterinarian and partner with all stakeholders for the best outcome.

We have an outstanding team of internal medicine and medical oncology specialists. They dedicate their energies and combined knowledge as committed professionals to the care of their patients and support of their clients.

We are dedicated to providing comprehensive patient care. Our internal medicine and oncology specialists are methodical, diligent and thorough in determining a diagnosis and developing a treatment plan. We believe in partnering with your primary veterinarian to create a well-rounded care experience for your pet.

In order to schedule a new patient appointment, *please provide the following:*

- A referral from your primary care veterinarian
- Past six months of medical history
- Any and all lab work, diagnostic reports and images
- A list of all current medications and dosages

Internal Medicine

Our internists consult on hematology, hepatology, gastroenterology, nephrology, rheumatology, endocrinology, gerontology and more.

Medical Oncology

Chemotherapy, immunotherapy, palliative care and hospice care.

**Radiation oncology available in Annapolis via VROC.*

Interventional Radiology

The use of minimally-invasive methods to diagnose and treat conditions of the respiratory system, gastrointestinal and urinary tracts. **Columbia location only.*

Specialized Procedures

Our internists perform CT and ultrasound imaging and endoscopic procedures for diagnosis of chronic conditions and removal of foreign body obstructions.
