

## CKD in cats can be challenging.

We are enrolling patients in a randomized, placebo-controlled clinical trial for cats with chronic kidney disease.

---

### Study Specifics

We are enrolling client-owned cats in a study that will evaluate the safety and effectiveness of a novel stem cell therapy preparation for the treatment of naturally occurring chronic kidney disease. Pet owners will be required to bring their cat in for seven study visits over a 6-month time period. Throughout the study, pet owners will be required to observe and record any abnormal observations, as well as food and water intake.

### Eligibility:

- Must be at least 1 year of age
- Diagnosis of stage 2 or 3 CKD
- Otherwise in good health or any chronic conditions are well controlled

### Funding:

This is a fully-funded study. At no cost to owner, qualified patients will receive

- Free veterinary consultation and exams
- Free diagnostics (blood work, ultrasound)
- Free investigational treatment

If you have a patient you believe to be a good candidate for this study OR you are interested in participating as a clinical investigator, please visit [animalci.com/cd-002/](https://animalci.com/cd-002/) for complete details or contact us at ACI: 301.841.0014, ext. 714.
