

INSTINCT

# Get your life back while saving lives

Meet the revolution in veterinary practice software.

Instinct is built in lockstep with leading veterinary hospitals to streamline busy patient care settings of all kinds, from university teaching hospitals to advanced care centers. Intuitive to use and constantly improving, Instinct is the foundation you need to run a modern veterinary hospital.

## Instinct Treatment Plan

A stand-alone workflow system that serves as your patient nerve center, digitizing outpatient and inpatient treatment flows.

## Instinct EMR

A full medical records and practice management system, built out of our meticulously designed Treatment Plan platform.

## Instinct Scripts

A first-of-its-kind e-prescribing module connecting veterinary practices and pharmacies to streamline Rx and refill workflows.

AVAILABLE IN BETA

# Modernize your whole practice with Instinct and **watch your team thrive**

## Why Instinct?

Instinct is thoughtfully designed by veterinary professionals and technology experts who truly understand the workflow needs of a busy practice. In addition to our well-loved Instinct Treatment Plan, we have been hard at work this past year launching Instinct EMR, our new full practice management system. We invite you to see our full suite of super-charged tools that help keep your teams happy, your hospital running smoothly, your patients safer than ever, and your medical charges captured.

See why the most advanced care centers on the planet are choosing Instinct.
