Urinary				
Calcium Oxalate Uroliths		Balanced Remedy*	Urinary SO	c/d
All Other Uroliths	Custom Formulation			
Kitten	Custom Formulation			
Adult Maintenance		Fish & Chicken		

FELINE RECOMMENDATIONS

TRANSITION FEEDING GUIDELINES

Every dog is different, and the time required to transition to a fresh whole food diet can vary, especially for dogs who are sensitive to dietary changes. Follow this guide for the smoothest transition.

DAYS 1-3 : 25% JustFoodForDogs / 75% current food

DAYS 4-7 : 50% JustFoodForDogs / 50% current food

DAYS 8-10 : 75% JustFoodForDogs / 25% current food

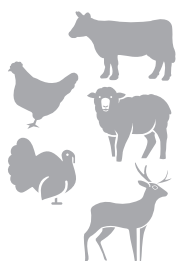

DAYS 11+ : 100% JustFoodForDogs

Cats do best if you switch cold turkey and avoid a long transition. If they don't eat after four meals, or one day, please feed them their regular food and then try again in a few days.

STORING & HANDLING

THAWING

← **FROZEN UNOPENED** - Good for 18 months

← **THAWED UNOPENED** - Good for 5-6 days

THAWED OPENED - Use within 3-4 days
