

MRI Solutions *for the Discerning Veterinary Specialist*

Are you interested in building a stronger Neurology Department?

So...what's stopping you?

- Are you interested in acquiring a top-shelf Neurologist but have no scanner to attract them?
- Do you have an older scanner that is becoming more and more expensive to maintain?
- Are you interested in upgrading from a low field scanner to a more dynamic unit?
- Are you losing 10 or more scans to outside practices?
- Are you interested in a mobile unit but are having problems with zoning or construction?
- Are you concerned with marketability and business development?
- Do your other responsibilities make it difficult to devote the necessary time to manage and cultivate a strong Neurology department?
- Do you have labor concerns relating to MRI Technologists or Vet Technicians?
- Are you simply concerned that you may not be able to afford an MRI or CT Scanner?

Through our comprehensive offerings we can assist practices by providing:

- Customized packages for MRI and CT units that most accurately meet the needs of each individual practice
- Ongoing management support which includes training, applications support, marketing support, business development, and staffing solutions
- Veterinary specific support; as an MRI facilitator ALL WE DO IS VETERINARY IMAGING which separates us from the competition
- A variety of unit options, including Mobile and Installed systems
- Zoning support and construction project management solutions
- Radiology support through AnimalScan staff
- A comprehensive maintenance and service package that includes coverage for chillers and cryogenes

- Additional service and product options such as MRI compatible ancillary equipment, sales consulting, and optional full-time labor support
- A complete library of preset veterinary MRI protocols cultivated over the past 15 years
- **And much more!!!!**

Why do practices work with us; it's because we:

- Offer affordable 1.5 T MRI Scanner Packages starting from \$9,950 per month
- National Siemens Partner with service, sales and training
- Are recognized as a market leader in veterinary imaging
- Have experience providing imaging solutions to a variety of practices ranging from single neurologist operations to multi-specialty operations to academic institutions
- Provide experts to consult in areas ranging from Anesthesiology to Radiology to MRI Equipment/Applications/Protocol Support
- Are an ACVIM Sponsor who can provide national recognition for our partnering practices
- Provide each practice a dedicated Development Coordinator who works to create market relationships, identify opportunities, and assist our practice in their growth initiatives.

CT *Revenue Growth through Advanced Diagnostic Services*

Where is your potential imaging revenue going?

*Your Siemens
Medical Veterinary Liaison*

SIEMENS

- Are you referring patients to outside practices for advancing imaging services?
- Are those cases returning for treatment with diagnostic reports?
- Are you losing 10 or more cases each month to outside practices?
- Is it time to grow revenue while increasing the diagnostic and treatments options available to your clients?

Consider CT for the following indications

- Brain
- Chronic Rhinitis
- Nasal Neoplasia
- Middle & Inner Ear Diseases
- Elbow & Brachial Plexus
- Abdominal Studies

*All Sale and Lease contracts include delivery, installation, set-up, 2 weeks of applications training

*CT Equipment Leasing and Sales**

- Advice & Site Preparation
- Construction
- Siemens OEM Service Contracts
- Local Service
- Veterinary Specific Imaging Support via ARRT Registered Technologists, Board Certified Veterinary Radiologists & Anesthesiologists

Construction Management

Taking the headache out of construction

We work exclusively with expert imaging contractors who are among the nations leaders in their field.

- Are you putting off an imaging upgrade because of the confusion associated with the construction necessary?
- Are you avoiding the frustration of dealing with contractors and the process of bidding and selection?
- Sick of the run around with zoning and permitting issues?

Imaging Construction Offerings include...

- **Advising** - Our technicians will make recommendations on steps and processes involved in your Imaging Construction
- **Consultation** - Strategic imaging project development which may include working directly with your project manager on zoning, ancillary equipment selection, and safety.
- **Management** - AnimalScan will work in concert with the construction team from initiation to completion, defining project parameters & benchmarks, and troubleshooting through the project's completion.
